URBAN INSTITUTE - ELEVATE - THE - DEBATE

A Profile of Virginia's Uninsured in 2019

March 5, 2021 Adele Shartzer and Joshua Aarons Urban Institute

Methods

- All data are from the American Community Survey (ACS) and the Behavioral Risk Factor Surveillance System (BRFSS), which are conducted by the US Census Bureau and the Centers for Disease Control and Prevention, respectively.
- The family structures and corresponding income and employment estimates presented in the ACS analyses are based on tax units, or groups of individuals whose income would likely be counted together for the purposes of eligibility for Medicaid or the Marketplace. Tax units are generally smaller than Census-reported families, and their income is generally lower than the Census estimates of family-based income. *As a result, the ACS estimates of the number of uninsured by income may not match those from other sources that are based on alternative family and income units.*
- ACS estimates reflect additional Urban Institute adjustments for potential misreporting of Medicaid/CHIP coverage on the ACS developed by Victoria Lynch under a grant from the Robert Wood Johnson Foundation, which has been updated with funding from the David and Lucile Packard Foundation.
- This report provides more in-depth information than the tables produced by the US Census Bureau.
- Virginia expanded its Medicaid program under the Affordable Care Act to nonelderly adults with family income up to 138 percent FPL, implemented in January 2019. *The 2019 data were collected continually throughout the year, so these data reflect a coverage picture over the course of the year and not at the conclusion of 2019.*

Source: Urban Institute, March 2021. Based on the 2019 American Community Survey (ACS) data from the Integrated Public Use Microdata Series (IPUMS). Estimates reflect additional Urban Institute adjustments for the underreporting of Medicaid/CHIP.

Notes: Family poverty level and work status estimates are based on the tax unit (e.g., the members of a family who would file taxes together and whose income is counted for the purposes of Health Insurance Marketplace or Medicaid eligibility). Number of uninsured are rounded to the nearest thousand. Estimates may not sum to 100% due to rounding.

a Nonelderly include all non-institutionalized, civilian individuals less than 65 years of age.

b Family poverty level estimates are based on tax unit Modified Adjusted Gross Income and use the 2019 Federal Poverty Levels (FPLs) defined by the US Department of Health and Human Services.

c Family work status is based on the work status of adults in the tax unit.

d SNAP is the Supplemental Nutrition Assistance Program, formerly known as Food Stamps.

'~' Indicates reference group.

'*' Indicates that the percentage is statistically different from the reference group percentage at the .10 level.

'#' Indicates that the state percentage is significantly different from the rest of the nation's percentage at the .10 level.

'A' Estimate should be interpreted with caution: the estimate's sample size is greater than 50 but the relative standard error is between 30% and 50%, making the estimate potentially unreliable.

Source: Urban Institute, March 2021. Based on the 2019 American Community Survey (ACS) data from the Integrated Public Use Microdata Series (IPUMS). Estimates reflect additional Urban Institute adjustments for the underreporting of Medicaid/CHIP.

Notes: Family poverty level and work status estimates are based on the tax unit (e.g., the members of a family who would file taxes together and whose income is counted for the purposes of Health Insurance Marketplace or Medicaid eligibility). Number of uninsured are rounded to the nearest thousand. Estimates may not sum to 100% due to rounding.

a Children include all non-institutionalized, civilian individuals less than 19 years of age. Estimates do not match estimates of uninsured children with incomes <200% FPL in Table 2 due to the inclusion of children 200-205% FPL.

b Family poverty level estimates are based on tax unit Modified Adjusted Gross Income and use the 2019 Federal Poverty Levels (FPLs) defined by the US Department of Health and Human Services.

c Family work status is based on the work status of adults in the tax unit.

d SNAP is the Supplemental Nutrition Assistance Program, formerly known as Food Stamps.

'~' Indicates reference group.

'*' Indicates that the percentage is statistically different from the reference group percentage at the .10 level.

'#' Indicates that the state percentage is significantly different from the rest of the nation's percentage at the .10 level.

'^' Estimate should be interpreted with caution: the estimate's sample size is greater than 50 but the relative standard error is between 30% and 50%, making the estimate potentially unreliable.

Notes: Family poverty level and work status estimates are based on the tax unit (e.g., the members of a family who would file taxes together and whose income is counted for the purposes of Health Insurance Marketplace or Medicaid eligibility). Number of uninsured are rounded to the nearest thousand. Estimates may not sum to 100% due to rounding.

a Adult parents include all non-institutionalized, civilian individuals 19 - 64 years of age who are the parent of at least one child in their household.

b Family poverty level estimates are based on tax unit Modified Adjusted Gross Income and use the 2019 Federal Poverty Levels (FPLs) defined by the US Department of Health and Human Services.

c Family work status is based on the work status of adults in the tax unit.

d SNAP is the Supplemental Nutrition Assistance Program, formerly known as Food Stamps.

'~' Indicates reference group.

'*' Indicates that the percentage is statistically different from the reference group percentage at the .10 level.

'#' Indicates that the state percentage is significantly different from the rest of the nation's percentage at the .10 level.

'^' Estimate should be interpreted with caution: the estimate's sample size is greater than 50 but the relative standard error is between 30% and 50%, making the estimate potentially unreliable.

Source: Urban Institute, March 2021. Based on the 2019 American Community Survey (ACS) data from the Integrated Public Use Microdata Series (IPUMS). Estimates reflect additional Urban Institute adjustments for the underreporting of Medicaid/CHIP.

Notes: Family poverty level and work status estimates are based on the tax unit (e.g., the members of a family who would file taxes together and whose income is counted for the purposes of Health Insurance Marketplace or Medicaid eligibility). The estimates presented here differ from those released in prior years because of a programming change to correct how tax unit income was being defined for the purposes of potential Medicaid eligibility. Number of uninsured are rounded to the nearest thousand. Estimates may not sum to 100% due to rounding.

a Adults include all non-institutionalized, civilian individuals 19 - 64 years of age.

b Family poverty level estimates are based on tax unit Modified Adjusted Gross Income and use the 2019 Federal Poverty Levels (FPLs) defined by the US Department of Health and Human Services.

c Family work status is based on the work status of adults in the tax unit.

d SNAP is the Supplemental Nutrition Assistance Program, formerly known as Food Stamps.

'~' Indicates reference group.

'*' Indicates that the percentage is statistically different from the reference group percentage at the .10 level.

'#' Indicates that the state percentage is significantly different from the rest of the nation's percentage at the .10 level.

'^' Estimate should be interpreted with caution: the estimate's sample size is greater than 50 but the relative standard error is between 30% and 50%, making the estimate potentially unreliable.

Source: Urban Institute, March 2021. Based on the 2019 American Community Survey (ACS) data from the Integrated Public Use Microdata Series (IPUMS). Estimates reflect additional Urban Institute adjustments for the underreporting of Medicaid/CHIP.

Notes: Family poverty level and work status estimates are based on the tax unit (e.g., the members of a family who would file taxes together and whose income is counted for the purposes of Health Insurance Marketplace or Medicaid eligibility). Number of uninsured are rounded to the nearest thousand. Estimates may not sum to 100% due to rounding.

a Young adults include all non-institutionalized, civilian individuals 19 - 26 years of age.

b Family poverty level estimates are based on tax unit Modified Adjusted Gross Income and use the 2019 Federal Poverty Levels (FPLs) defined by the US Department of Health and Human Services.

c Family work status is based on the work status of adults in the tax unit.

d SNAP is the Supplemental Nutrition Assistance Program, formerly known as Food Stamps.

'~' Indicates reference group.

'*' Indicates that the percentage is statistically different from the reference group percentage at the .10 level.

'#' Indicates that the state percentage is significantly different from the rest of the nation's percentage at the .10 level.

'^' Estimate should be interpreted with caution: the estimate's sample size is greater than 50 but the relative standard error is between 30% and 50%, making the estimate potentially unreliable.

Household does not receive SNAP	92,000	16.0% *	0.7%	84.9%	1.6%	3,741,000	17.5% *	0.1%	76.2%	0.3%	#

Notes: Family poverty level and work status estimates are based on the tax unit (e.g., the members of a family who would file taxes together and whose income is counted for the purposes of Health Insurance Marketplace or Medicaid eligibility). Number of uninsured are rounded to the nearest thousand. Estimates may not sum to 100% due to rounding.

a Family work status is based on the work status of adults in the tax unit. Non-Worker is defined as currently unemployed. Only nonelderly family members are included. b Family poverty level estimates are based on tax unit Modified Adjusted Gross Income and use the 2019 Federal Poverty Levels (FPLs) defined by the US Department of Health and Human Services.

c SNAP is the Supplemental Nutrition Assistance Program, formerly known as Food Stamps.

'~' Indicates reference group.

'*' Indicates that the percentage is statistically different from the reference group percentage at the .10 level.

'#' Indicates that the state percentage is significantly different from the rest of the nation's percentage at the .10 level.

'^' Estimate should be interpreted with caution: the estimate's sample size is greater than 50 but the relative standard error is between 30% and 50%, making the estimate potentially unreliable.

Source: Urban Institute, March 2021. Based on the 2018 and 2019 American Community Survey (ACS) data from the Integrated Public Use Microdata Series (IPUMS). Estimates reflect additional Urban Institute adjustments for the underreporting of Medicaid/CHIP. Notes: Family poverty level and work status estimates are based on the tax unit (e.g., the members of a family who would file taxes together and whose income is counted for the purposes of Health Insurance Marketplace or Medicaid eligibility). Number of uninsured are rounded to the nearest thousand. Estimates may not sum to 100% due to rounding. Changes in number and percent of uninsured are calculated before rounding, and so may not appear to sum to the estimates given.

a Children include all non-institutionalized, civilian individuals less than 19 years of age. Estimates do not match estimates of uninsured children with incomes <200% FPL in Table 16 due to the inclusion of children 200-205% FPL.

b Family poverty level estimates are based on tax unit Modified Adjusted Gross Income and use the 2018 and 2019 Federal Poverty Levels (FPLs) defined by the US Department of Health and Human Services.

c Family work status is based on the work status of adults in the tax unit.

d SNAP is the Supplemental Nutrition Assistance Program, formerly known as Food Stamps.

'#' indicates that change in number of uninsured individuals is statistically significantly at the .10 level.

'*' indicates that change in share of individuals who are uninsured is statistically significant at the .10 level.

'^' Estimate should be interpreted with caution: the estimate's sample size is greater than 50 but the relative standard error is between 30% and 50%, making the estimate potentially unreliable.

Source: Urban Institute, March 2021. Based on the 2018 and 2019 American Community Survey (ACS) data from the Integrated Public Use Microdata Series (IPUMS). Estimates reflect additional Urban Institute adjustments for the underreporting of Medicaid/CHIP. Notes: Family poverty level and work status estimates are based on the tax unit (e.g., the members of a family who would file taxes together and whose income is counted for the purposes of Health Insurance Marketplace or Medicaid eligibility). Number of uninsured are rounded to the nearest thousand. Estimates may not sum to 100% due to rounding. Changes in number and percent of uninsured are calculated before rounding, and so may not appear to sum to the estimates given.

a Adults include all non-institutionalized, civilian individuals 19 - 64 years of age.

b Family poverty level estimates are based on tax unit Modified Adjusted Gross Income and use the 2018 and 2019 Federal Poverty Levels (FPLs) defined by the US Department of Health and Human Services.

c Family work status is based on the work status of adults in the tax unit.

d SNAP is the Supplemental Nutrition Assistance Program, formerly known as Food Stamps.

'#' indicates that change in number of uninsured individuals is statistically significantly at the .10 level.

'*' indicates that change in share of individuals who are uninsured is statistically significant at the .10 level.

1^ Estimate should be interpreted with caution: the estimate's sample size is greater than 50 but the relative standard error is between 30% and 50%, making the estimate potentially unreliable.

Source: Urban Institute, March 2021. Based on the 2018 and 2019 American Community Survey (ACS) data from the Integrated Public Use Microdata Series (IPUMS). Estimates reflect additional Urban Institute adjustments for the underreporting of Medicaid/CHIP. Notes: Family poverty level and work status estimates are based on the tax unit (e.g., the members of a family who would file taxes together and whose income is counted for the purposes of Health Insurance Marketplace or Medicaid eligibility). Number of uninsured are rounded to the nearest thousand. Estimates may not sum to 100% due to rounding. Changes in number and percent of uninsured are calculated before rounding, and so may not appear to sum to the estimates given.

a Family work status is based on the work status of adults in the tax unit. Full-time is defined as currently employed and usually worked 35 hours or more in the weeks worked over the last year. Only nonelderly family members are included.

b Family poverty level estimates are based on tax unit Modified Adjusted Gross Income and use the 2018 and 2019 Federal Poverty Levels (FPLs) defined by the US Department of Health and Human Services.

c Family work status is based on the work status of adults in the tax unit.

d SNAP is the Supplemental Nutrition Assistance Program, formerly known as Food Stamps.

'#' indicates that change in number of uninsured individuals is statistically significantly at the .10 level.

'*' indicates that change in share of individuals who are uninsured is statistically significant at the .10 level.

1^ Estimate should be interpreted with caution: the estimate's sample size is greater than 50 but the relative standard error is between 30% and 50%, making the estimate potentially unreliable.

Notes: Family poverty level and work status estimates are based on the tax unit (e.g., the members of a family who would file taxes together and whose income is counted for the purposes of Health Insurance Marketplace or Medicaid eligibility). Number of uninsured are rounded to the nearest thousand. Estimates may not sum to 100% due to rounding. Changes in number and percent of uninsured are calculated before rounding, and so may not appear to sum to the estimates given.

a Nonelderly include all non-institutionalized, civilian individuals less than 65 years of age.

b Family poverty level estimates are based on tax unit Modified Adjusted Gross Income and use the 2010, 2018, and 2019 Federal Poverty Levels (FPLs) defined by the US Department of Health and Human Services.

c Family work status is based on the work status of adults in the tax unit.

d SNAP is the Supplemental Nutrition Assistance Program, formerly known as Food Stamps.

'#' Indicates that change in number of uninsured individuals is statistically significantly at the .10 level.

'*' Indicates that change in share of individuals who are uninsured is statistically significant at the .10 level.

'^' Estimate should be interpreted with caution: the estimate's sample size is greater than 50 but the relative standard error is between 30% and 50%, making the estimate potentially unreliable.

Table 26: Changes in Estimated Uninsurance among Children in Virginia and the United States, ACS 2010 to 2019

Source: Urban Institute, March 2021. Based on the 2010, 2018, and 2019 American Community Survey (ACS) data from the Integrated Public Use Microdata Series (IPUMS). Estimates reflect additional Urban Institute adjustments for the underreporting of Medicaid/CHIP.

Notes: Family poverty level and work status estimates are based on the tax unit (e.g., the members of a family who would file taxes together and whose income is counted for the purposes of Health Insurance Marketplace or Medicaid eligibility). Number of uninsured are rounded to the nearest thousand. Estimates may not sum to 100% due to rounding. Changes in number and percent of uninsured are calculated before rounding, and so may not appear to sum to the estimates given.

a Children include all non-institutionalized, civilian individuals less than 19 years of age.

b Family poverty level estimates are based on tax unit Modified Adjusted Gross Income and use the 2010, 2018, and 2019 Federal Poverty Levels (FPLs) defined by the US Department of Health and Human Services.

c Family work status is based on the work status of adults in the tax unit.

d SNAP is the Supplemental Nutrition Assistance Program, formerly known as Food Stamps.

'#' Indicates that change in number of uninsured individuals is statistically significantly at the .10 level.

'*' Indicates that change in share of individuals who are uninsured is statistically significant at the .10 level.

'^' Estimate should be interpreted with caution: the estimate's sample size is greater than 50 but the relative standard error is between 30% and 50%, making the estimate potentially unreliable.

Table 28: Changes in Estimated Uninsurance among Nonelderly Adults in Virginia and the United States, ACS 2010 to 2019

Source: Urban Institute, March 2021. Based on the 2010, 2018, and 2019 American Community Survey (ACS) data from the Integrated Public Use Microdata Series (IPUMS). Estimates reflect additional Urban Institute adjustments for the underreporting of Medicaid/CHIP.

Notes: Family poverty level and work status estimates are based on the tax unit (e.g., the members of a family who would file taxes together and whose income is counted for the purposes of Health Insurance Marketplace or Medicaid eligibility). Number of uninsured are rounded to the nearest thousand. Estimates may not sum to 100% due to rounding. Changes in number and percent of uninsured are calculated before rounding, and so may not appear to sum to the estimates given.

a Adults include all non-institutionalized, civilian individuals 19 - 64 years of age.

b Family poverty level estimates are based on tax unit Modified Adjusted Gross Income and use the 2010, 2018, and 2019 Federal Poverty Levels (FPLs) defined by the US Department of Health and Human Services.

c Family work status is based on the work status of adults in the tax unit.

d SNAP is the Supplemental Nutrition Assistance Program, formerly known as Food Stamps.

'#' Indicates that change in number of uninsured individuals is statistically significantly at the .10 level.

'*' Indicates that change in share of individuals who are uninsured is statistically significant at the .10 level.

'^' Estimate should be interpreted with caution: the estimate's sample size is greater than 50 but the relative standard error is between 30% and 50%, making the estimate potentially unreliable.

Table 32: Changes in Estimated Uninsurance among Non-Workers and Their Families in Virginia and the United States, ACS 2010 to 2019

Source: Urban Institute, March 2021. Based on the 2010, 2018, and 2019 American Community Survey (ACS) data from the Integrated Public Use Microdata Series (IPUMS). Estimates reflect additional Urban Institute adjustments for the underreporting of Medicaid/CHIP.

Notes: Family poverty level and work status estimates are based on the tax unit (e.g., the members of a family who would file taxes together and whose income is counted for the purposes of Health Insurance Marketplace or Medicaid eligibility). Number of uninsured are rounded to the nearest thousand. Estimates may not sum to 100% due to rounding. Changes in number and percent of uninsured are calculated before rounding, and so may not appear to sum to the estimates given.

a Family work status is based on the work status of adults in the tax unit. Non-Worker is defined as currently unemployed. Only nonelderly family members are included.

b Family poverty level estimates are based on tax unit Modified Adjusted Gross Income and use the 2010, 2018, and 2019 Federal Poverty Levels (FPLs) defined by the US Department of Health and Human Services.

c SNAP is the Supplemental Nutrition Assistance Program, formerly known as Food Stamps.

'*' Indicates that change in share of individuals who are uninsured is statistically significant at the .10 level.

'^' Estimate should be interpreted with caution: the estimate's sample size is greater than 50 but the relative standard error is between 30% and 50%, making the estimate potentially unreliable.

Source: Urban Institute, March 2021. Based on the 2019 American Community Survey (ACS) data from the Integrated Public Use Microdata Series (IPUMS). Estimates reflect additional Urban Institute adjustments for the underreporting of Medicaid/CHIP. Notes: Family poverty level and work status estimates are based on the health insurance unit (e.g., the members of a nuclear family who would be covered under one health insurance policy). Number of uninsured are rounded to the nearest thousand. Estimates may not sum to 100% due to rounding. Family poverty level estimates are based on HIU gross income and use the 2019 Federal Poverty Levels (FPLs) defined by the U.S.

Family poverty level such as a concounting goal name in a concept of count overty count overty count of the source of the count overty count over

between 30% and 50%, making the estimate potentially unreliable.

Source: Urban Institute, March 2021. Based on the 2019 American Community Survey (ACS) data from the Integrated Public Use Microdata Series (IPUMS). Estimates reflect additional Urban Institute adjustments for the underreporting of Medicaid/CHIP. Notes: Family poverty level and work status estimates are based on the health insurance unit (e.g., the members of a nuclear family who would be covered under one health insurance policy). Number of uninsured are rounded to the nearest thousand. Estimates may not sum to 100% due to rounding. Family poverty level estimates are based on HIU gross income and use the 2019 Federal Poverty Levels (FPLs) defined by the U.S.

Family poverty level such as a concounting goal name in a concept of count overty count overty count of the source of the count overty count over between 30% and 50%, making the estimate potentially unreliable.

Source: Urban Institute, March 2021. Based on the 2019 American Community Survey (ACS) data from the Integrated Public Use Microdata Series (IPUMS). Estimates reflect additional Urban Institute adjustments for the underreporting of Medicaid/CHIP. Notes: Family poverty level and work status estimates are based on the health insurance unit (e.g., the members of a nuclear family who would be covered under one health insurance policy). Number of uninsured are rounded to the nearest thousand. Estimates may not sum to 100% due to rounding. Family poverty level estimates are based on HIU gross income and use the 2019 Federal Poverty Levels (FPLs) defined by the U.S.

Family poverty level such as a concounting goal name in a concept of count overty count overty count of the source of the count overty count over

between 30% and 50%, making the estimate potentially unreliable.

Source: Urban Institute, March 2021. Based on the 2019 American Community Survey (ACS) data from the Integrated Public Use Microdata Series (IPUMS). Estimates reflect additional Urban Institute adjustments for the underreporting of Medicaid/CHIP. Microdata Series (IPUMS). Estimates reflect additional Urban Institute adjustments for the underreporting of Medicaid/CHIP. Notes: Family poverty level and work status estimates are based on the health insurance unit (e.g., the members of a nuclear family who would be covered under one health insurance policy). Number of uninsured are rounded to the nearest thousand. Estimates may not sum to 100% due to rounding. Family poverty level estimates are based on HIU gross income and use the 2019 Federal Poverty Levels (FPLs) defined by the U.S. Census Bureau. '#' Indicates that the regional percentage is significantly different from the state percentage at the .10 level. '* Estimate should be interpreted with caution: the estimate's sample size is greater than 50 but the relative standard error is between 30% and 50%, making the estimate potentially unreliable.

Table R12: Estimated Uninsurance by Age and Income in Virginia and Regions of Virginia, ACS 2019

Source: Urban Institute, March 2021. Based on the 2019 American Community Survey (ACS) data from the Integrated Public Use Microdata Series (IPUMS). Estimates reflect additional Urban Institute adjustments for the underreporting of Medicaid/CHIP. Notes: Family poverty level and work status estimates are based on the health insurance unit (e.g., the members of a nuclear family who would be covered under one health insurance policy). Number of uninsured are rounded to the nearest thousand. Estimates may not sum to 100% due to rounding. Family poverty level estimates are based on HIU gross income and use the 2019 Federal Poverty Levels (FPLs) defined by the U.S.

 "A standard of the standard of the grown to the standard of the s between 30% and 50%, making the estimate potentially unreliable.

Source: Behavioral Risk Factor Surveillance System, 2018 and 2018

Notes: N is number of observations. All estimates are for nonelderly adults aged 18-64, including both the insured and the uninsured. Dental and medication data only available for Virginia. In 2018, the response rate for whether a respondent had insurance coverage that paid for some or all of their dental care was lower than other years, which may have impacted the estimate for that year. In 2017, 73.0% reported any kind of insurance coverage that paid for some or all of your routine dental care, not significantly different from 2019.

*/**/*** Estimate is significantly different from estimate for 2018 at the 0.1/0.05/0.01 level.

^ Estimate is significantly different from estimate for Virginia at the 0.1 level.
