## VHCF Strategic Planning Program

The purpose of the strategic planning program is to offer funding to health access organizations that would like to conduct organizational strategic planning with the guidance of a professional consultant. These funds are available to current and former VHCF grantees, as well as other health access organizations on a case-by-case basis (*and as funding allows*). In order to receive these funds, organizations must complete the attached form to receive **pre-approval** for their strategic planning efforts. The maximum allowable amount of funding per organization is \$3,500 every three years.

You can access this form online [here](#). You will need to setup an account to complete the form. In order to access your account at a later time, please bookmark your account page and remember your password.

Grantees will be notified about the availability of funds within two weeks of the form's receipt. Reimbursement for strategic planning will be made upon VHCF's receipt of a final draft of the completed strategic plan and a receipt for consultant services provided.

To help get you started, we have enclosed a list of potential strategic planning consultants. You are, however, not limited to the use of these individuals. If you have any questions about this program, please contact a Program Officer, at 804-828-5804.
